

Automated Menu Planning Suite (AMPS)

Menu Planning Made Simple!

The Automated Menu Planning Suite (AMPS) add-on module saves time and money by automatically writing menus once a master menu and the appropriate tables are built in Hospitality Suite®. This feature is particularly time-saving for facilities that frequently change their menu cycles. AMPS can be used by a central location to generate menus for their off-site facilities, creating and managing menus at a central location in one schema for all sites. It can also be used to create off-site therapeutic menus to sister facilities, such as retirement homes or meal delivery programs. If you are looking for a solution to streamline menu planning and save time, look no further, as Computrition's AMPS module can assist you with your menu planning needs.

Key Benefits with AMPS

- Total integration with Hospitality Suite
- User defined setup of Therapeutic diet and Substitution Types
- Set recipe substitution assignments such as portion size changes and substituted recipes
- Automated Therapeutic diet menu creation based on substitution assignments
- User-defined cycles/date ranges for reporting
- Menu Guide and Therapeutic diet spreadsheet report
- Therapeutic Menu Nutrient Averages report
- Menu Extended Recipe report: Generates a cycle-based recipe book and table of contents
- Enhanced Menu Calendar, Menu Nutrient Analysis, Production Worksheet and Shopping List reports for cycle-based menus

If you need to quickly create new patient cycle menus or need to develop multiple sets of menus for various sites, then AMPS is for you!
